Gary;

Thanks for the response. I'll touch base with you when I get the Wastewater's response.

Phil:

At this point the RP is still conducting the removal action and we believe that they intend on completing the action. If they stop or suspend work, EPA will likely take over the action and complete it depending on the available funding. As you know, EPA is not required to get a permit for things done on site but we would work to meet the standards established in what would be in a permit. I would go ahead and issue the permit if it meets with TCEQ's approval and we will discuss further should EPA have to take over the removal work.

Thanks

Rafael;

How does this affect the on-going work TRC is/has been doing. It looks like they may be about to get their discharge permit for the wastewater irrigation plan. If that's granted, is the RP going to be treating/discharging the accumulated rainwater, or will EPA take it over?

Anna, Kenneth, Phil, Gloria Moran informed me today that the sale of the refinery did not occur. It looks like we will perform the RI/FS with the \$500k letter of credit. More to come later.

Rafael,

I reviewed the table with the Reporting Limit and was not overly concerned. The majority of screening values that were exceeded we based on unlikely exposure scenarios. Please see the attached file with my comments in the far right column. Let me know if you have any questions.

Anna
